**FOR IMMEDIATE RELEASE**

## **Crosslink Releases Adjustable Link**

August 10, 2008 – Crosslink International Inc., manufacturer of rubber and rubber to metal applications for the automotive, industrial, and specialty markets recently released an adjustable link for high temperature applications. The adjustable link is used in a heavy duty exhaust system modules. The part design utilizes two high temperature silicone bushings, a reverse thread spacer, and two forged eyelets.

This project proves Crosslink's strength and ability to design and develop 'black box' applications in short periods of time, with exceptional results. This application was prototyped, tested and released for a large automotive corporation.

Crosslink International, Inc is a World-Class Elastomers Company serving the Automotive, Industrial and Specialty OEM markets. Our core competencies revolve around the Design and Development of complex rubber, and rubber to metal applications. Crosslink is dedicated to being the leading provider of high-quality, custom elastomer products to the Americas, European and Asian markets.
