FOR IMMEDIATE RELEASE

Crosslink International Installs Accounts Receivable System

June 02, 2014 – Crosslink International Inc., manufacturer of rubber and rubber to metal applications for the automotive, industrial, and specialty markets recently installed an Accounts Receivable system to help improve and calculate the days and percentage of incoming payments.

This system allows Crosslink to improve our accounts receivable payments on a weekly basis. Since updating the system our receivables have been reduced from an average of 65 days to 45 days; an improvement of 30% collections.

This system allows Crosslink to more effectively manage our cash flow and re-allocate it throughout the business.

Crosslink International, Inc is a World-Class Elastomers Company serving the Automotive, Industrial and Specialty OEM markets. Our core competencies revolve around the Design and Development of complex rubber, and rubber to metal applications. Crosslink is dedicated to being the leading provider of high-quality, custom elastomer products to the Americas, European and Asian markets.
