INDUSTRIES

Automotive

Some of our current automotive products consist of non-fluid engine mounts, exhaust isolators, body mounts, and a variety of undercarriage and power train bushings.

Industrial

Crosslink is a leading supplier of rubber and rubber to metal for the industrial market. Current Industrial applications include machine mounting systems, machine leveling mounts, body and cab mounting systems, heavy duty door stops, as well as, many types of grommets, bumpers, boots, and seals.

Heavy Truck

Crosslink International, Inc. currently offers a variety of rubber and silicone products for the Heavy Truck, Bus, and Coach markets. Our offering includes high temperature exhaust systems, radiator mounting systems, body mounting systems, engine mounting systems, as well as a large selection of free rubber for undercarriage and chassis.

Our Core Competency

We are recognized as a World Class rubber molding facility. Our core business is rubber molding, and Crosslink International, Inc. is technically strong in bonding polymers and silicones with steel, aluminum, and TPE's.

Crosslink International, Inc. has an experienced staff for full charge compound development. Our capabilities include advanced design engineering for applications, tooling, and bonding materials as necessary. All of our products are unique to customer specifications, and are made to resolve noise, vibration, harshness, thermal control, mounting, fluid seal, and/or environmental issues.

INDUSTRIES

Aerospace

Some typical rubber applications would be: isolators for auxiliary power units, o-rings used in connectors, pumps and oil reservoirs, bleed air valves, firewall seals, T-seals, Radial lip seals used in pumps, and various dampers and bumpers.

Bus & Coach

Our Bus & Coach products help dampen and isolate transmissible noise from the engine compartment and undercarriage into the driver and passenger cabin areas. Crosslink offers a wide range of materials and product designs that will enhance and improve ride quality.

Specialty

Crosslink is a leading supplier of custom designed products for the agricultural, marine, rail, golf cart, sport vehicle, and utility vehicle business. Our current specialty products support a variety of under carriage isolations components, rubber bonded bushings, rubber engine covers, and isolation seats. Other parts consist of counter acting dampers, and basic grommets.
