FOR IMMEDIATE RELEASE

Crosslink Dedicates Engineer to Engine Manufacturers

February 09, 2007 – Crosslink International Inc., manufacturer of rubber and rubber to metal applications for the automotive, industrial, and specialty markets has recently dedicated an engineer entirely for rubber engine applications. Crosslink has had much success with DuPonts Viton® for fuel line, high and low temperature applications, as well as anti-vibration products.

The increase to Crosslink's labor force continues to demonstrate its commitment to supporting our customers with our core competencies, and will in the future, increase applications in this area.

Crosslink International, Inc is a World-Class Elastomers Company serving the Automotive, Industrial and Specialty OEM markets. Our core competencies revolve around the Design and Development of complex rubber, and rubber to metal applications. Crosslink is dedicated to being the leading provider of high-quality, custom elastomer products to the Americas, European and Asian markets.
